

Directorate of Curriculum and Teacher Education
Khyber Pakhtunkhwa, Abbottabad.
Induction Program Phase-III. (Exam-II)

PST

Time: 03hrs

Subject: General Science

Total Marks: 70

Section A

(Marks: 14)

Q.1. Choose the correct answer and write them in your Answer book.

1. The process in which seeds grow into new plant is called.
(a) Imbibition (b) Germination (c) Vernalization (d) Fertilization
2. The natural ability of a body to resist diseases is called:
(a) Control (b) Inflection (c) Vaccination (d) Immunity
3. Tuberculosis (TB) and Typhoid are caused by:
(a) Fungus (b) Virus (c) Bacteria (d) Yeast
4. A seed kept in low temperature does not grow because:
(a) It does not get light (b) It does not get air
(c) It does not get water (d) it does not get proper temperature to grow
5. The main cause of air pollution is:
(a) Burning of fuels (b) Garbage (c) Fertilizers (d) Forests
6. Droplet of water vapors suspended in the air closed to the ground is called:
(a) Dew (b) Frost (c) Rain (d) Fog
7. Which of the following is physical change?
(a) Decaying of fruits (b) Burning of wood
(c) Rusting of iron (d) Expansion of metals on heating
8. A freely suspended magnet always points:
(a) East-west direction (b) North-south direction
(c) Random direction (d) First north-south then east-west direction
9. The biggest part of the earth by volume is:
(a) Crust (b) Mantle (c) External core (d) Internal core
10. When balloons were rubbed with woolen cloth, they become:
(a) Negatively charged (b) Positively charged
(c) Oppositely charged (d) Didn't get charged
11. Inquiry-based learning in science education emphasizes:
(a) Teacher-centered instruction (b) Student exploration and questioning
(c) Rote memorization (d) Limited student involvement
12. How can teachers promote scientific literacy among students?
(a) By focusing solely on scientific terminology
(b) By encouraging discussion of science in everyday life
(c) By avoiding controversial scientific topics
(d) By limiting access to scientific resources
13. What is the primary goal of science education?
(a) To memorize facts (b) To encourage critical thinking
(c) To learn the history of science (d) To pass standardized tests
14. The use of models in teaching science is important because:
(a) They provide a physical representation of concepts (b) They replace the need for experiments
(c) They are easier to memorize (d) They limit student interaction

Section B

(Marks: 28)

NOTE: Attempt any Seven questions. All questions carry equal marks.

- Q 2. What are fossils and how are they formed?
- Q 3. Differentiate between the types of human teeth and write their functions.
- Q 4. Define contagious diseases and how can contagious diseases be prevented?
- Q 5. What is greenhouse effect and how does it impact the environment?
- Q 6. Why does a geo-stationary satellite appear to be stationary?
- Q 7. What is electromagnet? Give examples.
- Q 8. How does observation play role in science?
- Q 9. How can technology be used to enhance science teaching and learning?

Section C

(Marks: 28)

NOTE: Attempt any Two questions.

- Q.10. (a) What is an ecosystem? Explain the components of an ecosystem. (8)
 - (b) Compare herbivores, carnivores, and omnivores. (6)
- Q.11. (a) What is physical change? What process occurs during change in the states of matter? (8)
 - (b) Differentiate between dilute and concentrated solutions with examples. (6)
- Q.12. (a) Define soil, explain different types of soil. (8)
 - (b) Why the speed of sound is different in different material? (6)
- Q.13. (a) What are the effective ways to teach environment lesson to children? (8)
 - (b) Explore the importance of maps, charts, and models in teaching. (6)
